### Falls Creek News – Hwy 42 entrance renovation

The entrance of our neighborhood at Hwy 42 has been revitalized and now sports new landscaping, trees, and shrubbery. In addition, trees along the Creek side of the entrance that were not growing, have been removed and tuck-pointing of the damaged portion of that stone wall is being done. Finally lighting on the Prospect side has been improved and landscaping has been redesigned to reduce water drainage and soil erosion behind the stone wall there.

This has been done after due consideration by the HOA Board and allocation of significant funds resulting from your HOA fees. These improvements gives our neighborhood entrance a new look, designed to please existing and future residents. Please feel free to give us any feedback as you regard the changes.
